Ring up big profits with a Comp/Edit digital typesetter.

You don't set type for fun. You set type for profit.

Now, your business can be more profitable than ever, with our new, enhanced Comp/Edit 6400 digital typesetter.

Faster throughput.

We've increased the speed to 175 lines per minute. And added powerful new software that makes editing and composition faster and easier.

The bottom line: more type in less time.

You can work even faster if you have our Image Previewer option. It shows your copy in size and position, on-screen before any type is set. If you want to make changes, just push a few buttons, then preview again.

The bottom line: perfect output the first time, with no costly, time-consuming re-runs or patches.

Expand your business.

Use our telecommunications option to capture more business. If your customers use word processors or computers, show them how easy it is to send their input over phone lines, from across town or across the country, directly to your Comp/Edit system.

Then, you can automatically produce high-quality typeset output, with no re-keyboarding, that will enhance the appearance of all their printed communications.

The bottom line: more business volume from current customers, and more opportunities to attract new customers.

Why wait to ring up big profits?

Call Varityper and find out why more and more smart business people are calling our machine the Comp/Edit profit-setting system.

Call toll-free 1-800-631-8134. In Alaska, Hawaii and New Jersey, 201-887-8000, ext. 999.

The type for this ad was entirely composed on the Comp/Edit system.
